

Rotary Club of Leesburg (Sunrise) 31st Annual Blood Screening

Proceeds from this Rotary fund-raiser have been used to help local organizations and projects. The Rotary Club of Leesburg (Sunrise) is also proud to be part of the Rotary International initiative to eradicate polio as well as other international service projects.

THIS IS A FASTING BLOOD TEST: NOTHING TO EAT OR DRINK EXCEPT WATER FOR 12 HOURS PRIOR TO THE TEST!

Blood must be drawn Saturday, February 16, 2019, between the hours of 6:30 a.m. and 10:30 a.m.
New location this year!

Leesburg Center for the Arts, 429 W. Magnolia St, Leesburg, Florida.

**Sorry- No refunds, no rain checks, no blood drawn at a different time or location.
Fees for the blood screening are considered a donation to Rotary Club of Leesburg (Sunrise)**

Thanks to HealthLink Diagnostic Laboratories, we are still able to keep the cost of the basic test at only \$45
Optional Tests This Year

[You must register for the basic test in order to add any or all of these tests]

An optional **PSA** (Prostate Specific Antigen) test is available for men for an additional \$25.

An optional **A1C** test (for diabetes) is available for \$20

An optional **TSH** test (for thyroid) is available for \$40

Registration Deadline: Tuesday, February 12, 2019

Walk-ins the day of the screening may be subject to delay

BLOOD TESTS IN THIS SCREENING INCLUDE:

Cholesterol (Blood Lipids)	Elevated levels are associated with heart disease
Triglyceride (Blood Fat)	Elevated levels are associated with both heart disease and diabetes
High Density Lipoprotein	Good cholesterol –decreased levels increase the risk of heart disease
Low Density Lipoprotein	Bad cholesterol- elevated levels are the primary source of blocked arteries and heart disease
Liver Enzymes	Elevated levels may have several causes- consult your doctor
Glucose (Blood Sugar)	Elevated levels are associated with diabetes
Potassium	Acid-base and water balance: both low and high values may indicate disease
Creatinine	Elevated levels may indicate decreased kidney function
Hemogram	Screening test for anemia and other conditions
White Blood Count	Elevated levels may indicate infection or leukemia
